EDUCATION

Laurea | [Polytechnic University of Turin](#)

2014 – 2017

Graduated 110/110.

Mathematics, Physics, Chemistry, Electronics, Automation fundamentals. Computer Science: Algorithms, Data Structures, Architectures, Computer Networks, Operating Systems, Databases.

Laurea Magistrale, Master of Science | [Polytechnic University of Turin](#), [University of Illinois at Chicago](#)

2017 – 2019

GPA: 4.0

- Databases advanced topics (Datawarehouse, DBMS, Data Mining). Big Data (**Hadoop MapReduce, Spark, Spark Machine Learning framework, Spark Streaming framework**).
- Advanced networking (IPv6 and Interoperability, QoS, WAN).
- Software Engineering and Information Systems.
- Advanced Computer Architectures (ARM, MIPS64). Advanced Operating Systems (UNIX and WINDOWS programming. UNIX kernel). Distributed Programming (UNIX socket API, Websites programming).
- Neural Networks (Perceptron, Gradient Descent, LMS, Backpropagation, Associative Memory, Hopfield networks, SVM, PCA, Pattern Recognition, Classification, Prediction, Clustering. **Deep Learning: Convolutional NN, GAN, LSTM, BiLSTM**).
- Information Retrieval (Index construction, Scoring, Term Weighting, Vector Space Model, Evaluation, Relevance Feedback and Query Expansion, Language models, Web search, Web crawling, Link analysis, **Text classification and mining**, Naive Bayes, Sentiment analysis, Recommender Systems, Keyphrase Extraction).

EXPERIENCE

- Teaching Assistant - [Databases](#) | [Polytechnic University of Turin](#)
03/01/2017 – 06/16/2017
Assist 200 students of "Database" course during laboratory hours on weekly basis, dealing with SQL (Oracle, MySQL), Relational Algebra, fundamentals of HTML and PHP.
- Teaching Assistant - [Algorithms and Programming](#) | [Polytechnic University of Turin](#)
10/02/2016 – 01/20/2017
Assist 300 students of 'Algorithms and Programming' course during laboratory hours, on weekly basis. The course deals with Algorithms, Data Structures (Lists, Trees, FIFO, LIFO and priority queues, Hash tables, Graphs) and advanced Problem Solving, including Combinatorics in C.
- Research Assistant – [Deep Learning](#): | [University of Illinois at Chicago](#)
01/24/2019 – Current
Develop scalable architectures and high performing frameworks to classify Actionable information. The architecture I am focusing on makes use of **BiLSTM** in an **adversarial** approach within a **multi-task** environment. I am also involved in the development of a multi-lingual model.

SKILLS

1. **Python** (Fluent), **Java 9**(Fluent), C (Deep Prior Experience), MATLAB (Prior Experience), SQL, PHP (Prior Experience), HTML 5 (Prior Experience), CSS (Prior Experience), JavaScript (Prior Experience), ARM Assembly (Prior Experience), 8086 Assembly (Prior Experience).
Advanced: C, Python, Java, SQL.

2. Git, Github.
3. TensorFlow, TensorBoard.
4. AWS.

ACTIVITIES

[Languages](#):

- Italian native.
- English – C1. IELTS: Reading:8.5 Listening:9 Writing:6 Speaking:7.
- French: basic knowledge.

Projects:

- [Concurrent Socket Programming for File Transfers. Apr 2018 – Jul 2018](#)
Individual assignment for Distributed Programming course. Concurrent Client-Server program that transfers (large) files from the working directory of the server on demand. I managed access violations, crashes from both sides, etc. Client and server interacted via a custom communication protocol and used IP as Network layer and TCP as Transport layer. Platform Independent, deployed on UNIX. Coded in C using the Socket API.
- [Website w/ HTML, PHP, JavaScript, SQL, HTTPS. Apr 2018 – Jul 2018](#)
Individual Assignment for Distributed Programming Course. Development of a secure, reliable, consistent website that handled bookings for a fictitious transportation company. Password hashing and HTTPS protocol. ACID properties: were enforced by managing both sequential and concurrent access on the website. SQL, PHP, JavaScript, HTML injections were prevented.
Coded in: HTML, PHP, JavaScript, SQL. Protocols used: HTTP, HTTPS. Database Management System: MySQL in XAMPP platform.
- [ARM LandTiger V2.0 LPC1768 - Educational Library. Oct 2017 – Mar 2018](#)
Two-person project that aims at exploring some functionalities and features of the ARM LandTiger development board: GLCD and the TouchPanel peripherals.
These libraries are going to be used as a starting point for the laboratory classes of Advanced Computer Architectures at Politecnico di Torino. Coded in C and ARM Assembly. IDEs used: Eclipse and ARM Keil uVision.
Code: <https://github.com/arenn0/LandTiger>
- [Improvement of Business Process. Oct 2017 – Mar 2018](#)
A Four-person project for Information Systems course, with a large focus on teamwork. We analyzed a process, describing the architecture, its functional view via a UML class diagram, Business Process Model Notation (BPMN) diagram, Linear Responsibility Chart (LRC). Finally, we analyzed what changes could be done to the process, using as indicators Key Performance Indicator (KPI), Total Cost of Ownership (TCO), Return on Investment (ROI).
- [Tweet Actionability Classification. Sep 2018 – Dec 2018](#)
Two-person project. Our goal was to classify actionable information in tweets during disastrous events using an unsupervised approach. Our simple, but effective approach was able to rank tweets according to their actionability measure with a precision of 70% in the first 10 results. This is a good starting point, given that actionable information is considered as a classic 'needle-in-a-haystack' problem.
Code: <https://github.com/arenn0/TweetActionabilityClassification>

AWARDS:

- Invited Member of the Golden Key Organization at UIC for students in the top 15% of their class and top performing graduate students.
